CATALOGUE

LOCATION—We are located in northern New Jersey and our climate is such as to test the extreme hardness of all the varieties we list.

STOCK—Our stock is strong, healthy, cleanly and well-grown.

EARLY ORDERS—We cannot too strongly urge the placing of all orders early. This will insure your getting the best and largest assortment. On some of the rarer varieties our stock is necessarily very limited and early orders will mean that you will not be disappointed. To avoid errors please order by numbers shown opposite each variety.

DELIVERY—On all orders amounting to \$10.00 and over we prepay forwarding charges.

Orders for less than this sum will be sent express collect. If Parcel Post shipment is desired add 10% to the total value of your order. We do not solicit orders for less than \$1.00.

PACKING—Our prices include all packing charges.

CLAIMS FOR DAMAGE—All claims must be made direct to our office within 5 days of receipt of goods.

DAMAGE IN TRANSIT—All goods are at purchaser's risk after they are delivered to the forwarding company and we receive their receipt for shipment in good condition.

CLAIMS FOR DAMAGE IN TRANSIT—Claims for damage to goods while in transit must be made against the delivery company. Have delivery agent note the damaged condition on the express receipt and promptly present your claim to the transportation company.

QUANTITY PRICES—We will be pleased to quote on quantities of any of the varieties listed upon receipt of full particulars.

REMITTANCES—All remittances may be made by check or by Post Office Money Order. Do not send currency through the mails unless your letter containing same is registered.

PHOTOGRAPHS—On the following pages you will note a paragraph headed "PHOTOGRAPHS." It is worth reading. Our plan in this respect is unique and will give the buyer a proper idea of each plant.

VISITORS—Owing to our moving into our new quarters this spring, we do not—**AT THIS TIME**—encourage visitors to our premises. However, we hope to be in a position to extend a welcome to our many friends during the late summer or early fall of 1926, at which time, we expect to have our **DISPLAY ROCK GARDEN**—now under construction—completed. This rock garden will contain all the varieties listed by us and established in their proper settings. Alpines require some little time to become established. Please write us in advance of your visit and we will see to it that some member of our firm will be available to escort you through our display premises.

ROCK GARDEN BULBS—We will issue, during the early summer, our catalogue of bulbs for use in the rock garden. Write us in order to secure your copy. Many rare varieties will be listed.

After making out your order will you PLEASE LEND THIS CATALOGUE to gardening friends. You will be rendering a mutual service which we will appreciate.

FOREWORD

In taking up the work of propagating and growing ROCK PLANTS exclusively we feel that we are making history. To the best of our belief we are the only nursery dealing solely in the alpiners and evergreens for rock garden use. Our stock consists of the cream of our native American plants supplemented with the finer varieties from all points of the European and Asiatic continents. For many years England, France, Switzerland and other European nations were the only countries wherein this most fascinating branch of gardening was carried on to any great extent. In recent years, however, the American public—ever ready to recognize the beauties and charms of Nature—has taken to this, the finest of all, forms of gardening. At the present time we have many well-known and authoritative writers on this absorbing subject and our magazines and periodicals devoted to gardening are giving prominent places in their pages to rock garden articles.

There is no difficulty in growing alpiners. The safest and best rule is to follow nature. We have been experimenting for many years both in Europe and here in our own United States and we feel that the species and varieties that we have listed herein are those which may be depended upon to withstand the rigors of our variable climate. We are giving concise cultural directions which—if followed faithfully—will undoubtedly give the very best results. You will note that each variety listed by us is followed by a numerical cipher indicating the culture required.

CULTURAL NOTATIONS

- No. 1—Ordinary garden loam, not too rich but light and well-drained.
- No. 2—Semi-shade—northern aspect will do—porous soil, leaf mold with the addition of a small quantity of loam.
- No. 3—Marshy or bog plants—moist situation, with sphagnum or leaf mold with some loam and stone chips added. (If small stone chips are not available, coarse sand or gravel answers.)
- No. 4—Suitable for chinks or pockets in a stone wall or well-drained spot in rock garden, plain soil but rich in humus (decayed vegetable matter).
- No. 5—Shade—Acid soil— $\frac{3}{4}$ acid leaf mold (decayed evergreen leaves or needles) the balance to consist of equal quantities of sand and loam.
- No. 6—Ordinary rock plants—a well-drained position, full exposure to the sun and the soil to consist of $\frac{1}{2}$ leaf mold, $\frac{1}{4}$ sand and $\frac{1}{4}$ loam.
- No. 7—True alpine kinds—sharp drainage, soil to be $\frac{1}{2}$ coarse sand, $\frac{1}{4}$ loam, $\frac{1}{4}$ leaf mold and $\frac{1}{8}$ coarse gravel or small stone chips.
- No. 8—No lime, cultivate in sphagnum or leaf mold in a moist position, with good drainage.

The foregoing brief but very complete cultural directions are the results of our own very careful experimenting and study. To further explain these directions we will take for an example:

CYPRIPEDIUM grandiflorum—culture calls for No. 2.

Referring to the cultural directions you will find that No. 2 calls for “semi-Shade—northern aspect will do—porous soil, leaf mold with the addition of a small quantity of loam.” Carefully following these explicit directions success is assured. Again referring to:

ANDROSACE lactea—culture calls for No. 7.

No. 7 calls for “True alpine kinds—sharp drainage, soil to be $\frac{1}{2}$ sand, $\frac{1}{4}$ loam, $\frac{1}{4}$ leaf mold and $\frac{1}{8}$ coarse gravel or small stone chips.” Given these necessary requirements ANDROSACE LACTEA will surely give the satisfaction expected of it.

Again we repeat that the great secret for success in rock gardening—as in all other branches of this fascinating recreation—lies in giving the plants WHAT THEY HAVE HAD IN THEIR NATIVE HAUNTS or as near thereto as is possible. In other words follow Nature carefully.

Our Service Department is maintained for the purpose of assisting you in your rock garden problems. Our service is free and incurs no obligation. We welcome inquiries.

ILLUSTRATIONS

We call attention to the complete absence of illustrations in our catalogue. Our reasons for this are many. Primarily we feel that in illustrating any particular varieties attention is focussed on these to the detriment of many other equally fine and desirable kinds. Furthermore we feel that no half-tone illustration adequately portrays the beauties of the Alpine flora.

PHOTOGRAPHS

As a compensating factor for the omission of illustrations we have in the course of preparation handsome photographs—**BEAUTIFULLY COLORED TRUE TO NATURE**—of the many varieties listed by us. These will be available for distribution during the summer and fall of 1926. We feel that in no other way can the beauties of these plants be **FAITHFULLY** reproduced. Owing to the great expense involved we cannot send these photographs promiscuously. Accordingly we propose making a nominal charge of 25c. each for the use of same which charge will be **PROMPTLY REFUNDED** upon the return of the photographs—in good condition—to us. If an order results from the use of these we will **CREDIT** your account with the amount advanced. Publication rights of these photographs will be reserved by us as same will be copyrighted.

To those patrons who are in doubt as to what varieties to order, we respectfully suggest, that you send us the amount you wish to spend and we will send you a collection of choice kinds—suited to your needs—and at a saving to you. The only additional information we require is some idea as to the location of your garden, i. e. whether facing north, south, east or west; also some information as to the nature of the soil, whether clay, sandy, loamy, rocky or woodland. We feel reasonably confident that you will be delighted with the service we render and the quality of our plants. *If not entirely satisfactory return the shipment to us and your money will be **PROMPTLY REFUNDED**.* We stand solidly behind the quality of the plants we sell.

Our most valuable asset is a satisfied customer.

If we cannot supply the variety ordered we will substitute the best available type unless you specifically state "No substitutions."

EVERGREENS AND CONIFERS

We take a pardonable pride in our stock of conifers and evergreen shrubs. Not only are those varieties herein listed entirely suited for the Alpine or Rock Garden, but in addition—owing to their low stature—are more valuable than the taller sorts for plantings around the home grounds. They add that touch of vibrant pulsating life to the winter garden that is not only charming and delightful but also really essential.

Our stock is of the very highest quality, transplanted at least twice and often three or four times, thus insuring that very healthy root condition which constitutes a prime necessity for all evergreens.

Prices—except where otherwise noted—include balling and burlapping. In other words they are shipped, so dug and wrapped, that a good sized ball of earth around the roots is included.

ANDROMEDA—Plant in wood loam soil in semi-shade. The **LILY-OF-THE-VALLEY BUSH**.

1000 **Catesbæi**—Attractive white flowers in May followed by delightful coloring in the Autumn. Fine specimen plants. 15" Each.....\$2.25

1002 **Floribunda**—Similar to the above but more floriferous and somewhat earlier in blooming. Fine specimen plants. 15" Each.....\$3.25

AZALEA—Prefers wood loam soil or other soil with humus.

1004 **Amœna**—The **JAPANESE AZALEA**; purplish red flowers in abundance with fine contrasting foliage. A delight in late April.

Each 6" to 8".....\$1.25 8" to 10".....\$1.50 10" to 12".....\$2.25

1006 **Hinodegiri**—The **RED JAPANESE AZALEA**; flowers bright carmine-pink most effective in groups, fine companion to *Amœna*. Fine bloomer.

Each 6" to 8".....\$1.30 8" to 10".....\$1.75 10" to 12".....\$2.50

BIOTA—Ordinary garden soil. Indifferent as to position.

1008 **Orientalis Compacta**—**SIEBOLD'S ARBORVITÆ**, fine brilliant green color, very neat and compact in growth. Fine specimen plants.

Each 12".....\$1.50 15".....\$2.00

1010 **Orientalis Compacta nana aurea**—**BERCHMAN'S GOLDEN ARBORVITÆ**. A very fine slow grower most suitable for rock gardens, fine golden yellow foliage. A superb kind that we strongly recommend.

Each 6" to 8".....\$1.25 8" to 10".....\$1.75
10" to 12".....\$2.00 18".....\$4.50

BUXUS—Ordinary garden soil. The **DWARF BOX**.

1012 **Suffruticosa—The true Dwarf Box. A real little green gem for specimen planting in the rock garden or for edgings to the formal plantings.

Per ten bushes 4".....\$3.25 6".....\$6.00 8".....\$10.00 10" each.....\$1.50

**Not balled or burlapped.

COTONEASTER—Ordinary garden soil. Fine spreading bushes.

1014 **Horizontalis Davidiana**—The **ROCKSPRAY**, low and slow growing, spreading dark green foliage with red berries in the fall. Lovely.

Each 12".....\$1.25 15".....\$1.75

1016 **Macrophylla**—The **DWARF ROCKSPRAY**, very small, very dark green ovate leaves and dwarfer than the preceeding variety.

Each 15".....\$1.50 18".....\$2.00

CHAMÆDAPHNE—Ordinary garden soil. The **LEATHERLEAF**.

1018 **Calyculata**—White flowers in April. This species holds its leaves throughout the winter. Very useful and attractive.

Each 15" to 18".....\$1.75 18" to 24".....\$2.25

DAPHNE—Ordinary garden soil, but the addition of humus is beneficial.

1022 **Cneorum**—The **GARLAND FLOWER**. An aristocrat of the evergreens. Narrow glossy green leaves and fragrant bright pink flowers. Strong plants.

Each \$2.00

Our most valuable asset is a satisfied customer.

DAPHNE—The following kinds are not evergreen but are delightful.

- 1024 **Mezereum**—One of the charmers of the early spring rock garden display with pinkish lilac blooms. Flowers appear before the leaves. A real gem.

Pot grown plants only. Each \$1.25

- 1026 **Genkwa**—Similar to the above with large lilac fragrant blossoms on bare stems. A delight in the rockery. Pot grown plants only. Each \$1.35.

EUONYMOUS—Ordinary loamy soil. The **BABY WINTERCREEPER**.

- 1028 **Radicans Minimus**—a charming tiny evergreen creeper, clinging to stones and making a fine cover. Each 15" to 18".....\$1.25

JUNIPERUS—Ordinary soils. The **JUNIPERS**.

- 1030 **Chinensis Sargenti**—**SARGENT'S JUNIPER**. A most valuable evergreen ground cover and rock plant. Prostrate habit with fine green color.

Each 12" to 15".....\$3.50

- 1032 **Communis depressa**—**PROSTRATE JUNIPER**. Spreading branches, neat and very interesting in the rock garden. Each 18".....\$2.50

- 1034 **Excelsa Stricta**—**SPINY GREEK JUNIPER**. Compact pyramidal shape, gray-green foliage. Fine for accentuating or for contrasty effects.

Each 12".....\$2.25 18".....\$5.00

- 1036 **Horizontalis Sabina Prostrata**—**SAVIN'S CREEPING JUNIPER**. One of the neatest of the trailing Junipers, well adapted to rock garden.

Each 15".....\$2.00 18".....\$2.75

- 1038 **Horizontalis Douglassi**—The **WAUKEGAN JUNIPER**. Long trailing branches with steel-blue foliage and makes a most delightful contrast against rockwork. The very best of the Junipers. Fine winter color.

Each 15".....\$3.00 18".....\$4.00

- 1040 **Japonica**—The **JAPANESE JUNIPER**, a low and slow grower and a most welcome and valuable addition to the well-stocked rock garden. Most beautiful green scaly leaves. Altogether a delight. Each 8" to 10".....\$2.00

- 1042 **Sabina tamariscifolia**—The **TAMARISK JUNIPER**. Like the **WAUKEGAN JUNIPER**, this variety is one of the best of the species. It is a flat spreading kind with a very fine soft texture, choice.

Each 12" to 15".....\$2.50 15" to 18".....\$3.25 18".....\$5.00

- 1044 **Japonica aurea variegata**—The **VARIGATED GOLDEN JAPANESE JUNIPER**. Fine for Japanese effects in the rock garden. A most delightful sort with golden tipped leaves, irregularly placed branches. Our stock is limited.

Each 12".....\$3.00

- 1046 **Virginalis globosa**—The **GLOBE JAPANESE JUNIPER**. Spherical-shaped thin round branches, very odd and in all ways very fine.

Each 12".....\$2.50 15".....\$3.00 18".....\$4.00

KALMIA—Acidic wood loam. Shade or sun.

- 1048 **Angustifolia**—The **SHEEP LAUREL**, a most charming dwarf evergreen plant with crimson or purple flowers. Fine grower. Each 9" to 12".....\$2.00

- 1050 **Glauca**—The **PALE SHEEP LAUREL**, a floriferous species bearing exquisite pink flowers in early spring. Each 8" to 12".....\$1.00

- 1052 **Latifolia**—The **MOUNTAIN LAUREL**, a fine evergreen shrub, pink and white flowers in June, fine for mass effects. Likes shade or sun.

Each 12" to 18".....\$2.00 18" to 24".....\$3.00

LEUCOTHOE—See **ANDROMEDA**.

LEIOPHYLLUM—Sandy wood loam soil. Sun or shade. The **SAND MYRTLE**.

- 1054 **Buxifolium**—Very fine shrub with pinkish white flowers, symmetrical and delightful spreading habit, small soft green leaves.

Each 8" to 12".....\$1.50

- 1056 **Prostratum**—The **ALLEGHANY SAND MYRTLE**, somewhat similar to the above but perhaps even more choice. Each 6" (spread) \$1.25

PICEA—Ordinary soil. The **SPRUCES**.

- 1058 **Alba Albertiana**—**DWARF ALBERTA SPRUCE**. Very slow growing kind, compact and most desirable for small scale plantings. We have only a very limited stock of this rare little gem. Each 10".....\$5.25 12".....\$6.50

The joys of a Rock Garden are beyond description. Why not start one now?

PICEA—*Continued.*

- 1060 **Excelsa Pumila**—DWARF NORWAY SPRUCE, a slow growing and very choice variety with deep green foliage. Most interesting and useful.

Each 18".....\$5.00 24".....\$7.50

PINUS—Ordinary soil.

- 1062 **Montana Mughus**—The MUGHO PINE. This variety forms a most attractive round topped bush and is equally suitable for rockery or for foundation plantings.

Each 15".....\$3.50 18".....\$5.00 24".....\$7.50

RETINISPORA—Ordinary garden soil. The CYPRESSES.

- 1064 **Ericoides**—The HEATHER CYPRESS, this variety has leaves which resemble the heather and which gives it a very pleasing cloud-like effect.

Each 18".....\$2.50 24".....\$4.00

- 1066—**Obtusa Gracilis**—The SLENDER HINOKI CYPRESS, a variety forming a pyramid of a beautiful rich shade of green, a very slow grower, a gem.

Each 18".....\$4.00 24".....\$5.00

- 1068 **Obtusa Gracilis Compacta**—The COMPACT HINOKI CYPRESS, similar to the above which might be termed the "vest pocket edition" of this very charming and delightful variety. Slow grower. Limited stock.

Each 12".....\$3.50 18".....\$5.00 24".....\$6.50

- 1070 **Obtusa Nana**—The DWARF HINOKI CYPRESS. We quote a well-known author "This tiny Hinoki Cypress is a most engaging pygmy with short deep green branchlets." Grows very slowly. Limited stock.

Each 10".....\$3.00

- 1072 **Obtusa Nana Aurea**—The GOLDEN DWARF HINOKI CYPRESS. The beautiful golden variety of the above gem. Very slow grower. Fine.

Each 10".....\$3.00

- 1074 **Plumosa Lutescens**—The DWARF YELLOW PLUME CYPRESS. Forms a low round shaped bush with yellow tipped branches. Fine and interesting.

Each 15".....\$3.50 18".....\$5.00

RHODODENDRON—Acidic wood loam.

The ALPINE RHODODENDRONS. Lovely dwarf kinds. Very choice.

- 1076 **Myrtifolium**—a lowly little gem with soft red flowers and fine foliage, choice kind which seldom exceeds 24 inches in height. Grand.

Each 15" to 18".....\$3.00 18" to 24".....\$4.00

- 1078 **Ovatum**—A fine companion to the above with light pink blossoms and foliage of a lovely green color. It is similar to the above with a neat habit of growth. Rarer than the above type.

Each 12" to 15".....\$3.50 15" to 18".....\$4.50

- 1080 **Wilsoni**—A very pretty pearly pink color with foliage of the type. This variety is somewhat more robust than the two preceding kinds. A very valuable dwarf evergreen for the rock garden.

Each 15" to 18".....\$3.50 18" to 24".....\$4.50 24" to 30".....\$6.50

- 1082 **Carolinianum**—The CAROLINIAN ROSE BAY, lovely rose-purple flowers and of a very compact bushy growth, thriving best in moist shady places.

Each 12".....\$2.50 15".....\$4.00 18".....\$5.50 24".....\$6.50

- 1084 **Carolinianum album**—The white flowered variety. A fine companion to the above. Fine for massed plantings.

Each 12".....\$2.50 15".....\$4.00 18".....\$5.50 24".....\$6.50

- 1086 **Catawbiense**—The CATAWBA ROSE BAY. Lovely large rosy purple blooms with fine deep green leaves. Profuse bloomer. Thrives in half shade.

Each 24".....\$3.00 30".....\$4.00 40".....\$6.00

- 1088 **Maximum**—The most exquisite light pink flowers blooming profusely in May and June. A robust grower and good for the larger spaces of the rock garden.

Each 24".....\$3.00 30".....\$4.00 36".....\$5.00

- 1090 **Minus (punctatum)**—The PIEDMONTSE RHODODENDRON. Pale pink flowers, a very choice species and quite slow in growth. Fine foliage.

Each 18".....\$3.50 36".....\$5.00

We stress the desirables—**Picea Alba Albertina** and **Pinus Montana Mughus**. They are indispensable.

TAXUS—Ordinary garden soil. The YEWs.

- 1092 **Baccata adpressa erecta**—The SHORT LEAF ENGLISH YEW. Delightful upright, neat habit with stiff green foliage crowded on the branches. Fine.
Each 10" to 12".....\$2.00
- 1094 **Baccata repandens**—SPREADING ENGLISH YEW. A fine variety with spreading horizontal habit and lovely dark blue-green color. Most valuable and interesting.
Each 15".....\$3.50 18".....\$5.00 24".....\$6.00
- 1096 **Cuspidata brevifolia**—DWARF JAPANESE YEW. Broad thick leaves of very dark green color. The Arnold Arboretum states that this is the most valuable of all dwarf evergreens.
Each 12".....\$3.00 15".....\$4.00 18".....\$5.00

THUJA—Ordinary garden soil. The ARBORVITÆs.

- 1098 **Occidentalis compacta**—PARSON'S DWARF ARBORVITÆ. Round-shaped with bright green foliage useful in the rock garden as well as for foundation planting.
Each 15".....\$2.50 18".....\$3.50
- 1100 **Occidentalis recurva nana**—The LITTLE GEM ARBORVITÆ. The popular name implies the true merits of this little evergreen. Fine for rock work.
Each 10".....\$2.25 12".....\$2.75
- 1102 **Occidentalis globosa**—The GLOBE ARBORVITÆ. Fine round shaped evergreens which may be put to many uses in every position in the rock garden.
Each 12".....\$2.25 15".....\$2.75
- 1104 **Occidentalis Hoveyi**—HOVEY'S ARBORVITÆ. A fine species with bright green foliage and oval in shape. Very symmetrical growth.
Each 15".....\$2.50 18".....\$3.00
- 1106 **Occidentalis umbraculifera**—The UMBRELLA ARBORVITÆ. A particularly choice low mushroom shaped evergreen with vivid green foliage. At home in the rock garden and also for planting around the home grounds.
Each 12".....\$2.25 15".....\$3.00

In bringing to a close our little brochure on the conifers and evergreens we again remind you that our stock is carefully selected and each shipment that we make may be taken as a criterion of what well-grown and healthy evergreens should be and again we repeat that we take a pardonable pride in being able to ship such fine specimens.

OUR BLUE RIBBON COLLECTION OF ROCK PLANTS AND DWARF EVERGREENS"

For the beginner who desires an assortment of easily grown Rock Plants suitable for his first venture into this delightful realm of alpine flora, we have made up a collection of desirables whose cultivation is simple and whose hardiness is beyond question. Indeed we might call this collection the key stone of the rock garden.

One 8" to 10"	Biota Orientalis nana aurea—list price.....	\$1.25 ea.
" 10"	Juniperus Tamariscifolia " "	2.00 "
" 18"	Picea Excelsa Pumila " "	5.00 "
" 12"	Pinus Mughus montana " "	2.75 "
" 10"	Retinspora obtusa nana " "	3.00 "
" 10"	Taxus Baccata repandens " "	2.00 "

Total list price if purchased separately.....\$16.00

Collection price for one of each variety as above.....\$12.50

Collection price for three of each variety as above.....\$32.00

NOTE: Owing to the very low prices of the above collections we cannot absorb the forwarding charges and consequently same will be shipped EXPRESS CHARGES COLLECT.

ADDITIONAL VARIETIES OF ROCK PLANTS. Besides the many varieties of plants listed herein, we have on hand limited quantities of other rare and very charming kinds of rock plants and we solicit inquiries for any not listed. Remember we are devoting our energies exclusively to the growing and cultivation of Alpines and periodically receive plants and seeds from the leading American and European collectors of the rare and unusual kinds.

TO GARDEN CLUBS: We have in the course of preparation beautifully colored lantern slides and expect to be able to give a series of lectures on this interesting subject during the coming fall and winter of 1926. Write us for particulars. Your inquiries will be promptly answered.

Our collection of Sedums contains the choicest sorts.
